

Sprout — Commands & Responses

What was commanded, and what came back — grouped A–E

Digital lending platform

A. Customer App

Command (Prompt)	Response / Result
1. "Show the customer's name on Home; a new sign-up's credit must be 0."	Home greets with the real profile name; new customers see 0 credit, not fake data.
2. "There should be a database that stores customer data."	Added a customers table capturing name/mobile/income at sign-up.
3. "Split into Name and Surname, show what the customer typed — no hardcoding."	Separate Name/Surname fields showing real input; all hardcoded values removed.
4. "The surname field overflows — lay it out cleanly for iPhone 17 Pro."	Fixed the overflow (min-width:0 on columns); layout fits the phone.
5. "Back must always return to the previous screen — across the whole app."	Reworked Back navigation to return correctly on every screen.
6. "No application yet — add an empty state, show the pending step on Home, allow resume."	Added an empty state + Home shows the pending step + a resume button.
7. "Add a step indicator and a searchable bank picker."	Added a step indicator on every screen + a type-to-search bank picker.
8. "The loan agreement isn't fully visible."	Made the loan agreement fully scrollable.
9. "Show already-disbursed, unpaid loans as debt; default 0 if none."	Auto-computes outstanding debt from disbursed loans; 0 when none.
10. "Use the National ID as the reference key."	Switched the existing-debt key to National ID + recovery from account cases.
11. "Pull the phone number from registration."	Auto-fills the phone from registration (read-only).
12. "Add a selfie step after the ID-card photo."	Added a selfie step after the ID card, surfaced to officers.
13. "Face frame, blink, turn left/right, auto-capture, then preview before confirm."	Built full guided liveness: blink/turn + auto-capture + preview.

B. Officer Console

Command (Prompt)	Response / Result
14. "Customers can upload but officers can't see the files."	Uploaded documents now appear in the officer console.

15. "The UI overlaps — allow setting status like other document types."	Fixed the overlap; status settable (Verified/Review/Re-request).
16. "Order applicant info first, from an underwriter's view."	Reordered so applicant data comes before the loan request.
17. "Let officers view the ID + selfie during underwriting."	ID front/back + selfie shown in the Identity card.
18. "Explain the formula behind each score component."	Score page shows 5 components with transparent formulas.
19. "The NCB score exists — why isn't it showing?"	Fixed by fetching the bureau score fresh at submit + backfilled old cases.
20. "Show submit date/time, sort oldest-first, color cases >1 day differently."	Queue shows submit time, oldest-first, aged (>1 day) highlighted red.
21. "Tell the officer every rule the case failed at pre-screen."	A banner listing every failed pre-screen rule.
22. "What does this button do? Remove it if it's useless."	Confirmed the button did nothing and removed it.
23. "A decline needs a reason; add an approver; the approver can escalate to a manager."	Reason enforced on reject + maker-checker + escalate-to-manager with a note.

C. Back Office & Configuration

Command (Prompt)	Response / Result
24. "Make the Back Office modern, on-brand, desktop-ready."	Built a navy-sidebar console laid out full-screen for desktop.
25. "Prescreen rules should be per-product, with a dropdown + Save/Reset."	Added a product dropdown + Save/Reset buttons.
26. "Pick a product first; rules are a subset of that product."	Product picked first; its rules load as a subset.
27. "Remove "All products"; configure one product at a time."	Removed the "All products" option; per-product configuration only.
28. "Create a credit-bureau DB with ID and score, e.g. Somchai 650."	Created a credit_bureau table (ID+score) + a management tab.
29. "Test that prescreen rules truly run and flag every failed rule."	Verified rules are enforced + every failed rule captured.
30. "Actually check documents — required ones must be uploaded."	Required documents must be uploaded or pre-screen fails.
31. "On mobile the menu vanishes and looks cluttered — make it friendly; keep desktop polished."	Slim top bar + a scrollable tab row + shortcuts (desktop stays polished).

D. Data, Accounts & Quality

Command (Prompt)	Response / Result
32. "Any mock data left? Switch everything to real user input."	Replaced all mock/hardcoded values with real user input end-to-end.
33. "Give me the admin back-office link."	Provided the /admin Back Office link.
34. "I forgot the officer username / password."	Reset the password + confirmed the correct account (approver@sprout.test).

E. Reusable general commands

Command (Prompt)	Response / Result
35. "Propose 3 approaches with pros/cons, then recommend the best."	You get 3 compared options with a clear recommendation.
36. "Review the code just changed for bugs and improvements."	You get a list of bugs/improvements from the latest diff.
37. "Summarize every feature built so far as a table."	You get a table summarizing all features.
38. "Test that it actually works and summarize the result."	You get verification that it works + a summary.
